

# Topological Fractal Dimension of Protein-Protein Interaction Networks

Mahan Ghafari<sup>a</sup>, Rocco Meli<sup>a</sup>, and Florian <sup>a</sup>

<sup>a</sup>Interdisciplinary Bioscience DTP, Rex Richards Building, Parks Road, University of Oxford

This manuscript was compiled on October 30, 2018

**Please provide an abstract of no more than 250 words in a single paragraph. Abstracts should explain to the general reader the major contributions of the article. References in the abstract must be cited in full within the abstract itself and cited in the text.**

Fractal Dimension, Protein-Protein Interaction Networks

**Subsection for Method.** Example text for subsection.

**ACKNOWLEDGMENTS.** Please include your acknowledgments here, set in a single paragraph. Please do not include any acknowledgments in the Supporting Information, or anywhere else in the manuscript.

This PNAS journal template is provided to help you write your work in the correct journal format. Instructions for use are provided below.

Note: please start your introduction without including the word “Introduction” as a section heading (except for math articles in the Physical Sciences section); this heading is implied in the first paragraphs.

## Section

**Format.** Many authors find it useful to organize their manuscripts with the following order of sections; Title, Author Affiliation, Keywords, Abstract, Significance Statement, Results, Discussion, Materials and methods, Acknowledgments, and References. Other orders and headings are permitted.

**References.** References should be cited in numerical order as they appear in text; this will be done automatically via bibtex, e.g. ( ? ) and ( ? ? ). All references should be included in the main manuscript file.

**Supporting Information (SI).** Authors should submit SI as a single separate PDF file, combining all text, figures, tables, movie legends, and SI references. PNAS will publish SI uncomposed, as the authors have provided it. Additional details can be found here: [policy on SI](#). For SI formatting instructions click [here](#). The PNAS Overleaf SI template can be found [here](#). Refer to the SI Appendix in the manuscript at an appropriate point in the text. Number supporting figures and tables starting with S1, S2, etc.

Authors who place detailed materials and methods in an SI Appendix must provide sufficient detail in the main text methods to enable a reader to follow the logic of the procedures and results and also must reference the SI methods. If a paper is fundamentally a study of a new method or technique, then the methods must be described completely in the main text.

## Materials and Methods

Please describe your materials and methods here. This can be more than one paragraph, and may contain subsections and equations as required. Authors should include a statement in the methods section describing how readers will be able to access the data in the paper.
